

SCHOOL BUILDING ADMINISTRATION

Each building principal shall develop, implement, and enforce rules and/or guidelines concerning the supervision and safety of children and any other visitors of staff members after school hours. Each principal is authorized to take appropriate disciplinary measures to ensure compliance with rules and/or guidelines.

The rules and/or guidelines of each school shall incorporate the requirements of School Board policy KK.

Staff members are strongly discouraged from allowing their own children or visitors on school grounds outside the regular school hours.

The School Board recognizes the potential for personal endangerment, as well as the potential for damage to public or private property caused by persons that are not staff members or students of that particular school.

Employees will be required to pay for any damages caused by their children and/or visitors on school property.
